Asian Solutions Pvt. Ltd

- Developed responsive Angular-based web applications

- Integrated REST APIs and optimized performance & UI/UX
- Ensured cross-browser and multi-device compatibility
- Worked on scalable and clean-code architecture
- Supported data analysis and business reporting systems

Frontend Developer codeAlpha inter

I worked as a Frontend Developer at CodeAlpha, where I gained practical experience in modern web development. During this experience, I worked on building responsive and user-friendly web interfaces using HTML, CSS, and JavaScript. This opportunity helped me improve my problem-solving skills, understand real project workflows, and strengthen my knowledge of frontend technologies. I also learned how to create clean UI designs and responsive layouts for different devices. Overall, this experience helped me grow as a developer and enhanced my confidence in building modern web applications.

PERSONAL PROJECTS

SSO.ID Project – Angular Contribution

- Worked on UI development and CRUD operations (Create, Read, Update, Delete)
- Integrated frontend with backend services

CCTV Guard AI – Team Project Contribution

- Collaborated with team on multiple development tasks
- Assisted in feature implementation, testing, and optimization

Final Year Project (FYP)

- Built full-stack system using Angular
- Implemented CRUD operations and REST API integration
- Worked on UI, backend connectivity, and testing
